

Why use FuelActive?

Diesel contamination is responsible for 80% of engine breakdowns causing damage to equipment and costing you time and money.

The Problem

Standard fuel pipes deliver contamination to the fuel system, causing premature wear and breakdown.

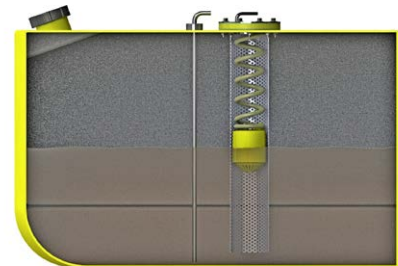

Our Solution

FuelActive delivers the cleanest fuel from the tank to the injectors to eradicate fuel contamination.

“The missing component” – A practical solution to fuel contamination

- || Increase & maintain engine performance
- || Improve fuel efficiency & reduce emissions
- || Reduce downtime & unscheduled maintenance
- || Innovative ‘patented’ solution to a global problem
- || Easy to fit (typically under 60 mins) & quick ROI
- || Eradicate fuel related breakdowns

FUELACTIVE UNIT SIZE	ENGINE SIZE (kW)
FA06 UNIT	1 - 100
FA10 UNIT	101 - 300
FA16 UNIT	301 - 500
HIGH HORSEPOWER UNIT	> 500

Fitted & Trusted Worldwide

“ Since the installation of FuelActive, we have seen a significant increase in the length of time we can keep our machines in production due to avoiding frequent filter changes, damaged fuel pumps & injectors. We can attest to FuelActive delivering real results & securing remarkable financial savings. ”

Huw Richards, Global Equipment Solutions

“ Trucks fitted with FuelActive were the only machines to continue operating when a batch of contaminated fuel was delivered to the mine site. ”
